//ABOUT ME

I enjoy developing software that makes a difference across various fields by automating tasks, creating useful features, and taking small steps toward innovation. I'm always open to learn and improve, and I welcome challenges.

//SKILLS

Knowledge levels: **Basic** | **Intermediate**

HTML, JAVASCRIPT, CSS, TAILWINDCSS, TYPESCRIPT     
REACTJS, NEXTJS, SVELTE   
NODEJS, EXPRESSJS, FASTAPI   
POSTGRESQL, MONGODB, FIREBASE   
C++, C, PYTHON   

LINUX, DOCKER, JEST, PORTAINER, VMWARE, AWS      

General Knowledge in Operating Systems (Linux), Networks, Web Architecture, Security, AI (RAG, Pipelines, LangChain)

//WORK EXPERIENCE

3 Years+ - Initially developed an asset management app for photovoltaic panels parks, and I gained experience in developing full-stack features and pipelines on the open-source project Open-WebUI (platform for interaction with LLMs) tailored to the company needs, using Svelte, FastAPI, SQLite, Chroma(vectorial database), while implementing RAG + contribution directly to the open source project.

I developed C++ backend for IOT edge computing, based on different kinds of devices like Raspberry PI5, ESP32, MOXA UC-4450A-T-5G, etc.

Learned to work with Docker, Jira, Bitbucket, Monday; improved my knowledge of Git for versioning, also working with a team based on the Kanban methodology.

2 Years + - Freelancing - I have worked on different projects in my free time from landing pages to ecommerce websites and more complex platforms like social media web app and online consultations via messages and video.

//EDUCATION

University Of Bucharest

Faculty of Mathematics and Informatics

Bachelor in Computer Science - finish in July 2025

Studied until now: OOP, Database Management (PL/SQL)

Computing System Architecture, Data Structure & Algorithms

Security Systems, Blockchain, Probabilities and Statistics

Accountant certificate - The Ministry of Education and Work

(1 month everyday training)
